About Us:

Greenware products are made of 100% biodegradable materials and hence leaves zero footprint in the nature.

Plasti Surge Industries has always been at the forefront of innovation and adopting new technologies. Greenware is our new initiative towards creating sustainable eco-friendly future.

Traditional plastic is made with fossil fuels and chemical fillers which remains in nature for very long time, when unprocessed and can cause severe harm to human, animal and plant life around it.

Greenware products which are made of eco-friendly and biodegradable material does not harm the nature and disintegrates into its originally form by natural degradation process. Hence Greenware is our investment for Greener Tomorrow.
